Background

I am a recent Computer Engineering graduate from Georgia Southern University looking for work in the Metro Atlanta area. I am skilled in Javascript, CSS, and multiple other languages as displayed below. I have strong leadership skills due to my time in the Southern Pride Marching Band drumline in a leadership role for 3 years. Along with marching band I have spent a lot of time being involved in team projects especially in the months leading up to my graduation.

Skills

Languages

JavaScript(ES6+), CSS, HTML, SCSS, SQL

Frameworks

React, Express, Node

Tools

PostgreSQL, Git, Netlify, Vercel

Design

Adobe Xd, Sketch, Adobe Illustrator

Education

Georgia Southern University
2015 - 2020 // Statesboro, GA

Bachelor of Science in Computer Engineering

Projects

Personal Website v2

This is a project that was built to display my skills with the purpose of showing off some of the frontend skills that have been developed along with some the design skills.

React Netlify CSS www.edgargriffin.com

Pre-launch Maker Site

Website built using react and CSS, template used to develop is from FrontendMentor.io and was launched on Vercel.com

React CSS www.landing-fem-edgar.vercel.app/

Todo List Site

Web app built using React and styled-components that is operable, The project is not complete the but design development is done.

React styled-component www.todo-list-fem.vercel.app/

Burger Menu Template

Web template built with the purpose of understanding how burger menus work and creating a template for use later on.

React CSS www.edgargriffin-burgermenu.netlify.app/

Tic-Tac-Toe Game

Web game built with he purpose to understand more vanilla Javascript concepts and creating a common game.

Javascript HTML CSS www.edgargriffin-tictactoe.netlify.app/

Personal Website v1

This was built with the purpose of displaying my skills and showing some of my projects but was not up to par so rebuilt.

React Netlify CSS

Game Jam 2 - World Message

This project was assigned to showcase the skills that had been created using the Unity Software.

Unity C#

Senior Capstone Project

This is a project assigned by the university to facilitate an understanding of the engineering principles introduced throughout the years of University.

Python PyTorch Jupyter Notebooks
